

Year 5 Class CAS Project: Collaboration with Baray Wisdom Nest School

Baray Wisdom Nest School, founded in 2015 by Mdm Esther Ding, affectionately known as Aunty Esther, aims to empower and support underprivileged children in the community.

The experience of classmates who have visited this missionary school in Cambodia on an Overseas Values-In-Action (OVIA) trip, and their familiarity with the environment, highlighted the need for the students to develop technological literacy.

We decided to take this invaluable opportunity to equip them with digital skills through a carefully curated PowerPoint course, a competency widely utilised in the digital age. We conducted sixteen online sessions for students in Grades 8 to 11, ages ranging from 14 to 17, on Saturdays from April 27 to July 27, 2024.

While we encountered challenges such as technical glitches, pacing issues, and language barriers, we worked together to overcome them and create engaging sessions for everyone. Overall, this was an enriching and fulfilling experience for us and we hope the students have benefitted from the sessions.
